

# A SUSTAINABLE & HEALTHIER FUTURE

CLEAN ENERGY • ADVANCED TRANSPORTATION • DEFENCE • AEROSPACE • MEDICAL

WE ENGINEER &  
MANUFACTURE:

Systems that increase the efficiency  
of *Fluid & Heat Transfer*

*Lightweight Structures*

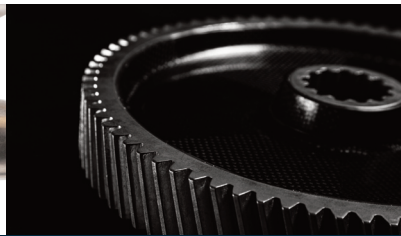

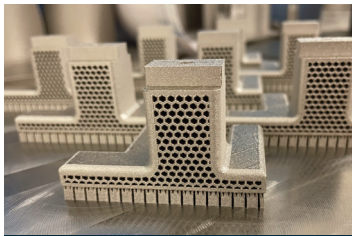

*Power Transmission*  
components & systems

Solutions for *Electrification*  
& *Sustainability* of transport

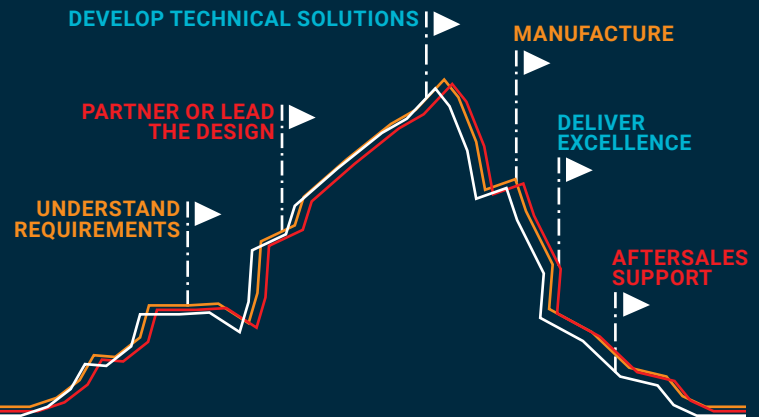

*Our simple ethos...*

We design our products for *minimum* material content, *maximum* integration of parts and *minimum* manufacturing complexity.

Growing value through innovation since 2000, Polar Technology Management Group is an engineering business operating at the leading edge of composite and metallic technology. Polar Technology, through its brands; Lentus Composites and SST Technology operates in a wide range of advanced engineering industries from the Horizon Technology Park in Oxfordshire, UK. The Group deliver products and technology based solutions around advanced composite materials, emerging metal processes and metallic fabrications.

## WE SUPPLY THE **COMPLETE PACKAGE** TO NAVIGATE YOUR JOURNEY

## FROM **CONCEPT** TO **SOLUTION**

# A SUSTAINABLE & HEALTHIER FUTURE

## OUR SUSTAINABILITY PROMISE

At the Polar Technology Group, we recognise that any manufacturing activity today has an impact on the finite resources of our planet and on the environment. From materials extraction through transport, transformation and subsequent disposal or reuse, the lifecycle of products is not sustainable in the long term. We recognise our responsibility in the continuous reduction of the environmental impact which our activities have.

We are also passionate about the positive impact that our technology, product design and manufacturing philosophy can have. With a unique portfolio, we are part of the solution to the global challenge of arriving at a future of net zero CO2 emissions and making a positive impact to our health. Committed to the journey the Polar Technology Group are always working towards a **Sustainable & Healthier Future**.
