# WHY CHOOSE FLAMEPRO?

---

At FlamePro Defence, we believe your suppliers should be an extension of your team, ensuring the swift delivery of mission-critical solutions. As a trusted logistical enabler, we specialise in sourcing, manufacturing, and delivering a wide range of non-lethal commodities to support the armed forces.

Working closely with the Ministry of Defence (MOD), we analyse requirements to provide optimal logistical solutions, leveraging our global supply chain to deliver materials precisely when and where they are needed.

## EFFICIENT SOURCING & SUPPLY

We streamline procurement by helping you identify genuine needs, explore solution alternatives, source materials, and track orders with speed and accuracy - all while reducing risks and ensuring seamless operations.

---

## SUSTAINING CAPABILITIES

We offer continuous access to a comprehensive range of non-lethal materials across logistical, health service, equipment, infrastructure, and administrative support sectors, providing a single, reliable source for global procurement.

---

## PROTECTING OUR FORCES

By utilising our extensive global sourcing and procurement network, we guarantee that essential materials reach personnel precisely when and where they are needed, ensuring continuous operational readiness.

---

## RAPID & RELIABLE DELIVERY

Our well-established supply chain ensures fast, dependable delivery, even in the most challenging environments, helping you maintain readiness without delays.

---

## TRUSTED EXPERTISE

With 20 years of experience supplying fire brigades and a trusted supplier for the Ministry of Defence, FlamePro delivers proven, life-saving PPE, technical fabrics, and safety equipment designed for those who put themselves on the front line.

---

## UNCOMPROMISING QUALITY

FlamePro's European-based manufacturing facility and global supply partnerships ensure exceptional quality, certified to ISO 9001:2015. Our in-house garment designers combine technical knowledge with real-world experience to create products that withstands extreme conditions, without compromising comfort.

---

# YOUR PATH TO PURCHASE

WE MAKE PROCUREMENT & MOBILISATION SIMPLE AND QUICK

---

## 1. JOINT CAPABILITY DEVELOPMENT

Working with you and our industry experts to create your statement of need.

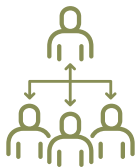

## 2. DETAILED PROPOSAL

Understand in detail your RFQ requirements, ensuring quality products, accurate logistics, lead times, and export licenses.

## 3. INTEGRATED LOGISTICS PLAN

We build a co-ordinated logistics plan outlining schedules, resources, risks, and communication timelines.

## 4. DEDICATED PROJECT MANAGEMENT TEAM

Clear, accurate communication, frequent reporting and robust timelines.

## 5. SEAMLESS DELIVERY

We ensure a smooth rollout of products and services in line with the agreed ILS, providing on-site support to uphold the highest quality standards.

## 6. ONGOING IMPROVEMENTS

Drive continuous improvement through effective Post Design Services, review meetings and targeted training programs.

## MOBILE INFRASTRUCTURE

Our global supply chain and unparalleled ability to distribute worldwide ensure that whatever you need to establish, mobile units can be sourced and delivered precisely where and when they are needed. Whether it's decoys, mobile hospitals, or steel-framed tents, we can source a comprehensive range of mobile infrastructure solutions designed to meet the unique demands of your military operations.

We understand the critical importance of reliable, robust, and rapidly deployable infrastructure in ensuring mission success. We supply infrastructure services that provide essential support to keep forces protected, sheltered, and safe, no matter where they need to set up base. With our extensive experience and commitment to quality, we have access to solutions that enable quick and efficient establishment of operational bases in any environment.

### Examples of materials we supply:

- Generators
- Heaters
- Lighting
- Water purification
- Tentage
- Decoys
- Amplifiers
- 3D printers and consumables

Our network means that we can source all your mobile infrastructure products, simply tell our team your requirements and we will find you the best logistical solution.

# RAPID PROCUREMENT

## UNIFORM

We are specialists in the design and manufacture of high quality garments, with access to some of the best technology in the world, and a heritage in designing and manufacturing life-saving technical PPE.

Our global strategic relationships enable us to rapidly respond to your changing operational requirements.

With battle dress options for all weather conditions, from extreme hot to extreme cold, covering waterproof and flame-resistant clothing, our uniform capability covers all bases.

As well as manufacturing and sourcing high-quality technical garments, we also source and supply boots and extreme cold weather equipment, as well as winterisation kits including sleeping bags, bivvies, stuff bags, roll mats and tents.

**Examples of materials we are able to supply:**

- **Soldier systems**
- **Firefighting uniform**
- **Personal clothing system/battle dress uniform in any requested pattern – including headwear**
- **Waterproof and cold weather combat clothing**
- **Frontline combat clothing**
- **Boots – waterproof and cold weather**
- **Winterisation kits – military sleeping bags, bivvy bags, stuff bags and roll mats**
- **Emergency response**

---

## PPE & LOAD CARRY

When the action is relentless, your team's PPE and load-carrying systems need to be too. Our military protective wear meets the most stringent standards to withstand the toughest conditions. When you need additional or replacement kit, you need an expert supplier on standby.

Within our global network we can access high-end combat personal protective equipment (PPE) including a range of MOLLE body armour and ultra-lightweight ballistic helmets, level 3A soft armour plates, neck and groin protection, level 4 ballistic plates, lightweight helmets and bergens.

### Examples of materials we supply:

- **MOLLE combat equipment** – MOLLE vest carrier, military back packs
- **Helmet and body armour** – body armour, lightweight ballistic helmets, soft armour, hard armour, ballistic plates, limb guards/protection
- **Ballistic eye protection**
- **PPE and load carry systems**

# RAPID PROCUREMENT

## MEDICAL SUPPLIES

When your team is deployed to provide rapid casualty intervention in military and humanitarian aid environments, we are right beside you with the kit you need. We're on hand to rapidly deploy essential frontline medical equipment, including high-quality combat medical kits, armoured ambulances, and field hospital modules.

From individual first aid kits designed and tested on the front line to Casevac/Medevac armoured and unarmoured vehicles, including fully-equipped mobile field hospitals, we can source and supply medical equipment to deal with the most precarious of operational situations.

Our mobile trauma surgeries have Role 2 and 3 capability. They can be removed in under 45 minutes and provide modern flexible facilities to improve the outcomes for people injured on the battlefield.

Our supply chain has worked with the UK Defence Medical School and holds specifications and stock of key vehicles and equipment for rapid supply. Vehicles and equipment have recently been supplied via rapid procurement to the Ukraine.

### Examples of materials we supply:

- **Individual first aid kits**
- **Team medic packs**
- **Surgical beds, stretchers, emergency response equipment - ambulances - Casavac/Medevac vehicles – armoured, patient transfer or emergency response (non-armour)**
- **Patient monitors, surgical equipment**

---

# LIFE SUPPORT SUPPLIES & EQUIPMENT

Governments around the world come to us for real-life support supplies because we get it right - every time. We focus on exceptional execution, attention to detail, and meeting quick turnaround demands on large-scale orders.

Our end-to-end real-life support capability includes ration packs (including combat rations) and a wide range of water carriage, storage, and purification equipment.

Working with ORP (UK) and MRE (US), we can develop and custom-make long-life rations to meet a wide variety of dietary needs. The resilience, size, and scale of our operation means we can rapidly ramp up manufacturing to meet urgent requirements.

Utilising our established logistics network, we can deliver swiftly to enable you to respond to operational demands.

## Examples of materials we supply:

- **Army consumables**  
Mess tins, entrenching tools, waterproof notepads/pens, frying pans, water bottles, drop pouches and PMEK
- **Ration packs**  
ORP/MRE meal packages, emergency food boxes, frontline resupply meals
- **Water storage**  
2,000-litre bowser trailers (Roles 1 & 2),  
5,000-litre pillow tanks (Roles 2 & 3)
- **Emergency relief**  
Bedding and mattresses, personal hygiene kits, generators and compressors

Ask us about any non-lethal life support requirements.

# RAPID INFRASTRUCTURE REQUIREMENTS

## CASE STUDY

### AN OVERVIEW

In response to urgent infrastructure needs in an operational theatre, FlamePro Defence was selected for its rapid mobilisation and procurement capabilities.

The objective was to source, co-ordinate, and deliver a wide range of essential items within a strict two-month timeframe following contract signing.

### THE REQUIREMENT

As part of the project, FlamePro Defence was tasked with procuring and delivering 16 distinct items vital to supporting operations. This diverse "shopping list" included items for personal safety, communication and health, highlighting FlamePro Defence's ability to handle complex, multidisciplinary supply requirements with efficiency and precision.

- **Electrical Equipment:** To support communications and operations in remote locations.
- **Tents:** Providing essential shelter and operational spaces in challenging environments.
- **Generators:** Ensuring reliable power supply for sustained operations in remote areas.

### RAPID SOURCING & MOBILISATION

With only two months from contract signing to final delivery, FlamePro Defence initiated a rapid mobilisation strategy that drew on its extensive supply chain network and project management expertise. The company's swift response was underpinned by several key actions:

#### **Strategic Procurement Co-ordination:**

FlamePro Defence activated a team of procurement specialists to quickly source all items from trusted suppliers, many of whom were selected for their ability to handle high-priority requests. This network allowed FlamePro Defence to secure even specialised items like surveillance equipment within the strict timeframe.

#### **Optimised Logistics Planning:**

Given the urgency and the wide variety of items, FlamePro Defence implemented an optimised logistics plan that prioritised efficiency at every stage of the process. By co-ordinating warehousing, packing, and transport seamlessly, the team reduced handling times and ensured that every item was ready for delivery as soon as it arrived from suppliers.

#### **Air & Ground Freight Solutions:**

Recognising the importance of timely delivery, FlamePro Defence opted for a combination of air and ground freight to transport items securely and swiftly into the theatre. This multimodal approach was essential in navigating complex logistics across international borders and ensuring that each item arrived on schedule.

### RESULTS

Every item on the procurement list was delivered on time, allowing operations to continue without delay. Each item met stringent quality standards, from the amplifiers enabling clear communication to the solar generators supporting independent power needs in remote locations.

FlamePro Defence's ability to handle evolving requirements in a high-pressure, international context reinforced its reputation as a trusted partner in critical infrastructure support.

# ESSENTIAL MILITARY PRODUCTS

## CASE STUDY

Ministry  
of Defence

## AN OVERVIEW

FlamePro Defence, a leader in providing high-quality, durable equipment for military personnel, was tasked with a crucial project: sourcing and delivering the first of five shipments of 12,000 essential military products as part of a contract with Ministry of Defence, United Kingdom.

The products ranged from Bergens to smaller but critical items like water bottles and mess tins. Thanks to its efficient mobilisation capabilities and expertise in managing logistics, FlamePro Defence successfully completed the project within the tight deadlines.

## THE REQUIREMENT

The delivery had to be completed in 5 shipments, ensuring that no military operations were delayed or compromised due to a lack of supplies.

FlamePro Defence needed to leverage its supply chain agility to meet the client's demands, ensure quality control, and mobilise swiftly to guarantee timely deliveries.

## RAPID SOURCING & MOBILISATION

### Sourcing & Manufacturing

FlamePro Defence co-ordinated with garment manufacturers and personal load-carrying equipment experts to ensure that the rucksacks met stringent quality and durability requirements.

### Efficient Supply Chain Co-ordination

The various smaller but equally important items, such as entrenching tools and water bottles, were sourced through trusted suppliers. FlamePro Defence's longstanding relationships with these suppliers allowed them to secure bulk quantities in a short space of time.

### Air Freight Delivery

To meet the client's timeline, FlamePro Defence opted for air freight as the primary mode of transportation for the shipments. This allowed for faster transit times compared to traditional sea freight, especially given the global locations involved.

### Shipping Logistics

FlamePro Defence used their network of logistics providers to ensure all products were delivered directly from the manufacturers to the client's specified locations with minimal handling in between.

Rucksacks

Bergens

## RESULTS

Through careful planning and execution, FlamePro Defence successfully delivered the first of five shipments of 12,000 products within the agreed timeline with the next four scheduled at a later date.

# BESPOKE PPE GARMENTS

## CASE STUDY

**Ministry of Defence - United Kingdom**  
**Supply and Distribution of PPE for the UK Ministry of Defence**  
**Distribution: 97 sites globally**  
**Contract Size: 5,000 full ensemble**

The United Kingdom Ministry of Defence (MOD) issued a contract to globally fit out all 97 UK defence sites with the supply and distribution of Personal Protective Equipment (PPE). This included full ensembles of equipment for 3000 personnel, as well as logistics cover beyond the United Kingdom to strategic UK defence sites.

# SLEEPING SYSTEMS

## CASE STUDY

**Ministry of Defence - United Kingdom, Poland, LENP**  
• **Arctic Sleeping bags (-30 degrees) 10,000**  
• **Arctic Bivvy Bags 10,000**  
• **Thick Roll Mats 10,000**  
• **Waterproof stuff bags 10,000**  
**Timing: 7 weeks, shipments every 2 weeks**

It was announced that the UK would send 10,000 sleeping kits to the Ukrainian Armed Forces to assist them in gruelling winter conditions. Suppliers, however, had lead times of 6-12 months on the sleeping systems, and the MOD needed them in 12 weeks.

Once DE&S and MOD had successfully validated our product, we used one of our contracted factories to successfully supply and ship the product. We carried out third-party inspections during production and carried out a final pre-shipment inspection for every shipment.

Working closely with our factories, we enabled fast and efficient deliveries to be made to the UK MOD. This, in turn, allowed the MOD to fulfil the government's promise to Ukraine - on time and in full for the winter period.

# PERSONAL PROTECTION

## ARMOUR

With over 25 years of experience, Highcom is a globally recognised leader in ballistic protection, providing advanced armour plates and tactical gear to military and law enforcement professionals worldwide.

### **GUARDIAN 4S17M LEVEL IV STAND ALONE HARD ARMOUR PLATE**

The Guardian 4s17m™ is a top-selling rifle armour solution, providing Level IV stand-alone protection against armour-piercing threats. Engineered with a ceramic strike face and polyethylene backing, it is both DEA and NIJ 0101.06 compliant.

### **GUARDIAN 3S15M LEVEL III+ ULTRA-LIGHTWEIGHT HARD ARMOUR PLATE**

The Guardian 3s15m™ is an ultra-lightweight plate offering Level III+ stand-alone protection against high-velocity rifle rounds. Manufactured using XTclave™ technology and 100% DSM Dyneema® UHMWPE, it enhances mobility without compromising safety.

### **GUARDIAN 4SAS7 LEVEL IV STAND ALONE HARD ARMOUR PLATE**

The Guardian 4sas7™ is a Level IV stand-alone plate designed for maximum protection against armour-piercing threats. Its robust construction ensures reliability in critical situations.

# ARMOUR

Specialising in cutting-edge ballistic solutions, Armor Life Lab delivers high-performance armour designed for modern combat and law enforcement applications.

## BALLISTIC PLATE LEVEL III ALLIGHT LLL

A Level III ballistic plate designed for high-performance protection against rifle rounds. Lightweight and versatile, this plate is engineered for tactical and law enforcement use.

## BALLISTIC PLATE LEVEL IV7 ULTRALIGHT IV OA

A Level IV7 plate that combines ultra-lightweight design with high-end protection against armour-piercing threats. Ideal for military and tactical operations requiring high mobility.

## BALLISTIC PLATE LEVEL IV ALLIGHT LV

A Level IV ballistic plate designed for superior protection against armour-piercing rounds. It provides exceptional defence while maintaining a manageable weight for ease of use in the field.

## BALLISTIC PLATE LEVEL III MODELO ULTRALIGHT LLL

A Level III ultralight plate, providing effective protection against rifle rounds with reduced weight for increased mobility. Suitable for operators in demanding environments.

# PERSONAL PROTECTION

---

## HELMETS

Offering a full range of ballistic helmets, Highcom ensures maximum protection and modularity for military and tactical operators.

---

### **STRIKER ACH**

The Striker ACH is a high-performance Advanced Combat Helmet (ACH) offering superior protection against ballistic and impact threats.

Designed for comfort and durability, it's ideal for military and law enforcement use.

### **STRIKER ACHMC**

The Striker ACHMC helmet is a modular version of the ACH, offering enhanced protection with added communication system integration.

This helmet is built for operational flexibility in the field.

### **STRIKER ACHHC**

The Striker ACHHC provides high-cut ballistic protection, offering improved mobility and comfort while maintaining full coverage.

It is perfect for tactical operations requiring a balance of protection and agility.

# HELMETS

Experts in head protection, Armor Life Lab designs lightweight, durable combat helmets that provide superior ballistic resistance and comfort.

## CASCO ACH

The ACH is designed for military and law enforcement personnel, offering protection against shrapnel and ballistic threats.

It provides comfort, durability, and superior coverage.

## CASCO BALLISTIC TIPO FAST

The FAST helmet offers enhanced ballistic protection with a lightweight design.

Ideal for tactical operations, it provides a high level of safety and mobility for operators.

## CASCO BALLISTIC TIPO MICH

The MICH (Modular Integrated Communications Helmet) is designed for maximum protection and comfort, commonly used by military personnel.

It provides excellent coverage while being lightweight and adaptable.

A wide range of camos and colours available

**CONTACT UBACS -  
MULTICAM®**

The Contact UBACS is a modern update of our classic UBACS design. It features a sturdy front and back yoke for enhanced durability when used with plate carriers.

**CONTACT C145 CARGOS -  
MULTICAM®**

The C145 was designed as a classic military-cut trouser, a familiar style with a simple mission: lightweight trousers with plenty of storage, a comfortable fit, and Arktis' signature engineered quality.

**CONTACT FIELD TROUSERS -  
MULTICAM®**

The next generation of Arktis combat trousers, the Contact Field Trousers, have been completely redesigned from the ground up with a new fit that maximises flexibility and comfort.

# NCU

## LAYERING SYSTEM

Supporting the Nordic Combat Uniform (NCU) Layering System, we provide essential products for Layers 0, 1A, 1B, and 4.

### LAYER 0

UNDERWEAR – BOXERS, HIPSTERS, BRA & T-SHIRT

Comfort during combat is critical, and it starts with the garments closest to your skin. The right base layer helps regulate body temperature, manages moisture, and ensures you stay focused on the mission, not on discomfort.

A unique collaboration between the nordic countries to develop a layering solution for all temperatures and activities.

## LAYER 1A

### NET UNDERWEAR

Designed to be next to skin. It consists of gender specific garments. Their mesh structure controls body temperature and transports moisture away from the skin.

When worn without the terry-wool underwear on top it allows high breathability, whereas when Layer 1B is worn on top, it effectively traps air to increase the insulation properties while still transporting moisture away from the user.

MALE

FEMALE

# NCU

## LAYERING SYSTEM

Supporting the Nordic Combat Uniform (NCU) Layering System, we provide essential products for Layers 0, 1A, 1B, and 4.

### LAYER 1B

#### TERRY WOOL LONG JOHNS, SHIRT & JACKET

Unisex underwear designed to be next to skin or on top of the Wool Mesh (Layer 1A). Layer 1B consists of undershirt, long pants and a thick full-zip jacket.

On the upper body, the Terry Wool Jacket can be worn as standalone or on top of the undershirt for maximum insulation.
