

## Defence Products

Active is able to offer a variety of specialist products for defence applications

### Combat ID & Beacons

Correct visual recognition provides the ultimate identification when potential lifesaving decisions are needed to be made, confidence in equipment is essential. Work with one of the world's leaders.

### Survival Products

We offer advice and a comprehensive supply of all types of survival kit for both military and civilian needs to aid survival in those lifesaving emergency situation

### Infrared & Thermal Vision

Active Electronics is a specialist in Night vision and Thermal optical equipment offering solutions for low light observation, clip-on sights, night driver viewers, digital day and night cameras, upgrade kits for armoured vehicles and SWIR optical sensors To view a selection of our products visit our website [www.active-electronics.co.uk](http://www.active-electronics.co.uk)

## Our Company

### Established over 40 years

Active Electronics Plc was established in 1974 and has become a leading Service Provider for electronic components and assemblies to the Aerospace, Defence and Hi-Rel Industries.

The UK Group Office in High Wycombe is supported by a procurement subsidiary in New York together with a sales office in Brisbane Australia. Active is a trusted source for all your electronic components and can offer tailored supply solutions with quality systems and processes second to none. We have a global sourcing ability and have the expertise and equipment to identify counterfeit components to ensure our customers only receive genuine products.

Mob: +61 402 056 590

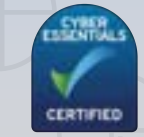

### USA - Procurement

Active's wholly owned U.S. procurement subsidiary (Est. 1982) based on Long Island to provide access to U.S. domestic pricing and reduced lead-time availability. This facility is Directorate of Defense Trade Control registered (DDTC 11533).

Understanding What's Important

EST. 1974

# Component Solutions

Active Electronics is able to offer a variety of specialist solutions for defence applications

### Sourcing

Through our worldwide sourcing expertise supported by our in-house sourcing technology we are able to source products at the lowest cost of acquisition or the shortest lead-time whichever is required. Using our engineering knowledge we have been successful in offering lower cost alternatives, subject to customer acceptance of course, which have delivered massive cost savings.

### Procurement

Active offers an innovative and customised procurement outsourcing service. Select from the various options available including: fixed margin contracts, open book pricing or even a full dedicated service provider and benefit from a lower cost of acquisition. With our superior processes supported by our Quality System the customer can be confident in being supplied the correct product every time on time. Using our sourcing expertise we can provide multi-source options to ensure competition is supply continuity is maintained.

# Component Solutions

### Importing

Active setup a fully owned U.S. subsidiary in 1982 which is DDTC registered for ITAR licences. This facility is AS9120B approved and offers our customers access to U.S. domestic pricing and availability. To further enhance our importing services to our customers we have a worldwide network of quality sourcing channels which offer the most effective and competitive access to overseas markets without the risk of counterfeit products.

### Kitting

With our Kitting expertise we guarantee more effective supplier management through a single vendor solution and reduced production costs with production ready kits. All these benefits are further enhanced by our cost-effective worldwide sourcing & procurement services resulting in delivering a lower cost of acquisition and more effective time management.

### Assembly

With our AS9100D approved in-house assembly facility we can offer fast turnaround quality products assembled to the highest standard. This service is of course supported by our component acquisition expertise ensuring an end product that is fully traceable, delivered on time and with all of the anti-counterfeit, obsolescence and U.S. Export Control mitigated.

# Supply Partners

At Active we have strong relationships with a number of carefully selected supply partners to provide world leading solutions in specialist areas.

	Circular, glass-to-metal, hermetically sealed electric connectors to Mil Standard
	Filtered Connectors and Interconnect devices for EMI and EMP protection for harsh environments
	Global interconnect specialist for the Military and Aerospace markets.
	Specialists in cable protection and identification
	Shielding materials experts for military, space, aerospace, telecommunications, medical, marine and automotive
	Static and dynamic sensors, instrumentation and cable for vibration, shock and pressure measurements
	Overcurrent protection and power distribution products
	Rugged MIL-STD IP-based communications solutions for military ground, air and naval applications
	Night Vision Monoculars and Binoculars, Clip-on Night Sights, Thermal imaging systems, SWIR systems
	Customised, high value solutions for fibre network simulation, testing, and monitoring applications
	Optoelectronic components, electronic assemblies and multi-chip microelectronic modules
	Combat Identification, IR marking beacons, cockpit illumination tools including Lip Light and Finger Light
	Design and manufacture high performance EMC backshells & bulkhead glands for Defence, Aerospace, Naval, Railroad, Power Distribution and Medical
	Design and manufacture of solar cells and solar sheets for a variety of applications, including unmanned aerial vehicles (UAVs), spacecraft and terrestrial use
	Incorporating Machlett, is a Manufacturer of Vacuum Tubes, Capacitors and Electron Tubes for Broadcast, Industrial, Marine, Medical, Food Processing, and Avionics applications
	Multi-contact connectors for harsh environments, military applications, CMA, Push-Pull audio connectors
