

TOOL KITTING SERVICE

Hearmar provide a range of options; from tool rolls, through to cases and roll cabinets, in a variety of different colours, as well as providing assistance with the design and configuration of your Kits.

We can tailor your toolkit to fit your needs, whether it's for electrical, avionic, mechanical, or a combination of both, just list the tools you need, and we'll customise it for you.

A foam inlay system allows for a neat and tidy organisation of tools, which makes a missing tool easier to detect.

Engraving of the tools, laser etching or printing to the foam can also provide a further level of tool control.

SERVICE CENTRE

Experience peace of mind with our accredited in-house Service, Repair, and Calibration Centre, catering to a diverse range of industries.

Our qualified technicians utilise specialised equipment and procedures to meticulously service, repair, and calibrate your equipment, guaranteeing compliance with relevant standards and ensuring your safety.

As the official UK Service Centre for esteemed brands such as DMC, Band-It, Steinell, and others, we stand as your trusted partner in equipment maintenance and care.
