

Your trusted partner in Aerospace and Defence

With a portfolio spanning Antennas, Avionics and Land equipment, we've been securing success in demanding environments since 1947

We engineer advanced, robust land-based and airborne products and solutions designed to empower critical civil and military operations in dynamic environments. Working closely with global defence agencies and aviation leaders, we've developed a broad range of solutions to meet your requirements, no matter how diverse or demanding.

We serve:

- Military forces
- Emergency services
- Government agencies
- Industry partners
- Original equipment manufacturer

Our customers are the driving force behind everything we do—we're proud to be on your team. Your needs, challenges and requirements shape every decision we make, whether delivering cutting-edge off-the-shelf solutions or tailoring bespoke systems.

chelton.com

ANTENNAS

PASSIVE ANTENNAS

Communication and identification in the most demanding environments

COLLISION AVOIDANCE SYSTEMS

2,000 per year for Airbus and Boeing commercial jets

TUNEABLE ANTENNAS

Multi-frequency antenna and logic unit systems

CONFORMAL ANTENNAS

Seamlessly integrating antennas into the skin of the aircraft

AVIONICS

GPS/GNSS ANTI-JAM SYSTEMS

High-performing GPS/GNSS Anti-jam Systems

AIRBORNE TETRA

The world's leading supplier of avionic-standard TETRA with the largest installed base in the world

DIRECTION FINDER

Equipment for civilian and combat Search and Rescue operations ensuring fast, accurate signal detection in critical missions

LAND

VEHICLE INTERCOM SYSTEMS

With over 150,000 systems in service across the world, Chelton's modular intercoms system is renowned for its reliability, ease of use and superior performance

LAND AND VEHICLE ANTENNAS

Link 16/TNNT, fixed, dismounted, and detachable options for ground operators

AIR TRAFFIC MANAGEMENT

Products and support services to civilian and military partners on land and sea platforms

GROUND PENETRATING RADAR SENSOR TECHNOLOGIES

High-performance sensors to enable multi-mode threat detection at greater depths
