

CONNECTIVITY GLOBAL GOVERNMENT SERVICES

KEY BENEFITS

- Full flexibility with bespoke solutions
- Complete control
- Rapid responses
- Wide coverage
- Guarantee of service
- Broad range of User Terminals built for harsh environments
- Seamless integration with industry-expert partners
- Predictable costs for long contract period

TYPICAL USE CASES

- Morale, Welfare & Recreation
- Maritime Situational Awareness
- Airborne ISR
- Tactical Communications
- Humanitarian Assistance & Disaster Recovery
- Law Enforcement In Rural Areas
- Border Security & Surveillance

ENSURING YOUR MISSION-CRITICAL SATELLITE COMMUNICATION NEEDS

Offering secure, resilient and assured connectivity for governmental activities, deployable at a moment's notice.

Complementing core sovereign satellite communications capacity in military bands, with **assured access** capacity in civilian bands, military organisations gain greater control over their mission-critical services.

This multi-band approach, with military and civilian bands, plus greater end-user control over satellite capacity with innovative SVSO (Secure Virtual Satellite Operator) solutions, offers you unprecedented flexibility to meet all your satellite communication needs.

Trusted partner from mission planning to mission success

Eutelsat Global Government Services understands your business. From mission planning to mission success, we support you from beginning to end.

Whatever you require, we can assist in all areas, from specific, scalable, secure connectivity services using Eutelsat ADVANCE, to putting you in charge of your own satellite capacity using innovative solutions such as EUTELSAT QUANTUM.

Global operator with proven track record

Eutelsat OneWeb offers worldwide coverage, through a fleet of 36 GEO, and +600 LEO satellites. We have an exceptional operational track record with highly reliable satellites, spanning over 40 years of service to governments and as a major supplier of satellite capacity to the US Department of Defense.

Our size and experience enables us to provide economies of scale to meet your critical needs. We have the scope to fulfil specific requirements, redeploying capacity where it's required, and share best practice and lessons we've learnt to help optimise your operations.

Infinite connectivity, infinite opportunities

We cover every continent with a strategically placed fleet of orbiting GEO and LEO satellites. It means no matter how remote the locations you visit, the distance you travel or the industry you are in, you remain connected at all times. The only solution provider to offer such global coverage, we are already helping governments, public sector organizations and enterprise to identify and leverage every opportunity – no matter where it is.

CONNECTIVITY GLOBAL GOVERNMENT

DYNAMIC HIGH-END CONNECTIVITY SERVICES

Maximise efficiency and have full control of your satcom services through a fully managed and reliable global connectivity solution. Available via our certified network of partners, and using future-proof technology, Eutelsat ADVANCE Government is a fully on-demand, secure, robust service with no commitment obligations. It provides a cutting-edge service platform accessible via API allowing partners to define and control their service packages according to their market needs.

MISSION ASSURANCE THROUGH ADVANCED GROUND SYSTEMS

Advanced and responsive ground systems architecture enables us to provide mission assurance with dynamic service provisioning. Automated service delivery is achieved via secure web portals and robust security tools and safeguards.

SARA

- **Secure** solutions from anti-jamming to cyphering for protected communication services
- **Agile** for constantly adapting response to evolving needs
- **Resilient** fully managed end-to-end solutions from ground to space
- **Assured** access to satellite communications with strong Service Level Agreements (SLA) and 24/7 customer care

COMMERCIAL AGILITY TAILORED TO YOUR NEEDS

Eutelsat OneWeb offers controlled access to a trusted ecosystem. This includes best-in-class partners able to develop a resilient and affordable range of services. Working closely with system integrators, we guarantee secure and seamless services from all our stakeholders. A variety of short, mid and long-term leases gives you contractual flexibility with tailored commercial arrangements to adapt to any government need.

EXPERIENCE IN HOSTED PAYLOADS & JOINT-VENTURE SATELLITES

Drawing on extensive experience in the design and operation of spacecraft under stringent financial constraints and demanding schedules, we efficiently manage these systems to reduce operational expenses. This approach enhances returns and optimizes the lifespan of in-orbit resources, all while ensuring safety and environmental sustainability. We can provide hosted payload opportunities for a faster, more economic path into space for sovereign missions, which can complement or initiate a stepped approach mode for fully-owned military and government systems.

SECURITY & RELIABILITY 24/7

Our operations centres ensure continuity and service quality on our satellites. With six owned and operated teleports, and over 60 partner teleports worldwide, we are able to monitor and control our entire fleet of satellites, guaranteeing the best quality reception and transmission of your services, on a 24/7 basis.

CONNECTIVITY SOLUTIONS ACROSS ALL DOMAINS:

ON LAND

We provide modular solutions with secure value-added services as well as specific robust terminals for operational agility – so you stay connected whether you are on pause or on the move. Our value-optimised business models also enable you to meet public budget constraints while keeping up with the latest global technological developments.

AT SEA

We let you provide connectivity tailored to the needs of coast guards, maritime surveillance, navies and other sea-based operations. Our high SLA-based solutions offer reliable comms and connectivity while our small maritime systems allow for easy antenna accommodation on vessels with limited room
