

Better Protected

Ringmounts

The modular and motorized ringmounts can be adapted to a variety of configurations without the need for garage facilities through changing e.g. the A-frame or softmount. SIMA recommends the motorized ringmounts for easier use even when on slopes and in heavy terrain. The portfolio covers four sizes of motorized ringmounts (inner diameter): 665mm, 750mm, 850mm & 900mm.

RM750SB-ES

RM850AL-ES

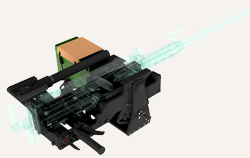

RM900AL-ES

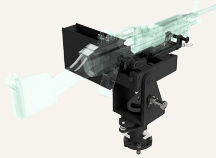

Softmounts

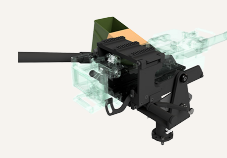

Our softmounts are designed specifically to enhance recoil absorption and vibration damping. Our softmount selection is designed for traditional heavy machine guns like the M2 Browning, to a range of light machine guns. Our softmounts stabilize the firing platform, supporting a steady grip and improving weapon precision. Each softmount follows the weapon for rapid change of capability.

Mount and accessories
for Dillon M134D

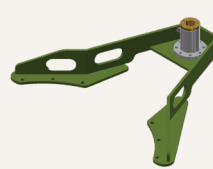

A-frames

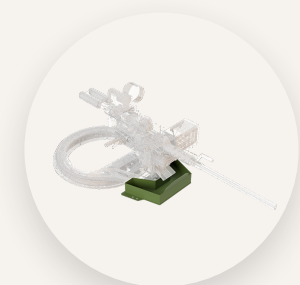

The two different A-frames support a variety of weapons. This adds to the flexibility of the overall system. The “standard A-frame” fits anything from 5.56mm light machine guns to .50 cal heavy machineguns, 40mm grenade launchers and miniguns. The reinforced A-frame supports the KNDS France P20 pintle mounted 20M621 cannon.

Accessories

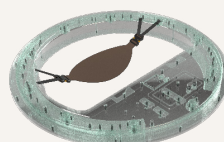

The ringmounts and Gunner Protection Kits can be tailored to operator specifications, requirements, and needs by adding a variety of accessories, as e.g. sun cover, ammo box brackets, spare barrel holder, manual operation handle, smoke launcher etc.

Better Protected

Security of Supply: Focus on national, Nordic, and European security interests, geographical proximity, strategically important capabilities, scalable supply chains, and resilience.

Partnerships & Collaboration: Long-term trusted partnerships, including B2G (industry to government), B2B (industry to industry), and G2G (government to government) collaborations. Supported by international partnerships and defence industry alliances.

Interoperability & Interchangeability: Standardized MOTS solutions, modular and upgradable concepts, and versatile, safe, and efficient solutions with training and sustainment.

SIMA Innovation has delivered 1500 ringmounts and turrets to various military units over nearly 20 years. Our "Better Protected" concept offers modular, interoperable solutions with many interchangeable parts. Designed with soldier input, our motorized ringmounts and turrets adapt to different vehicles and weapon types. Easy to use in stressful situations, they rotate 360° in 8 seconds. Combat-proven as they are, our solutions integrate with both new and legacy vehicles. Based in Denmark, we maintain a close supplier base.
