Drive Decisions with Automated Alerts.

Decision advantage is core to national security, but our nation's heroes are overwhelmed by data. Our software toolkit leverages cutting-edge Machine Learning.

Your Success is Our Mission.

- ☑ **Edge First.** Machine Learning for operations, even when comms are denied.
- ☑ **Easy to Use.** Intuitive, no-code. You tune our detection models, or build your own.
- ☑ **Hardware Agnostic.** Use almost any system and vendor.
- ☑ **Sharable Models & Data.** Share with individuals, teams, or ops centers. Even across an autonomous swarm.

Find the threat you're Looking for.

Accelerate the Intelligence Cycle

Leverage Machine Learning to automate alerts and monitor multiple sensors simultaneously, leaving analysts more time to do what they do best.

Unlock the Future of Autonomy

Empower unmanned systems with Automatic Target Recognition (ATR) and shared awareness so that you can see, sense, and target farther.

Transform Force Protection

Anomaly detection and automated alerting deliver comprehensive threat detection for base defense and force protection.
