

Advanced Materials, Uncompromised Protection

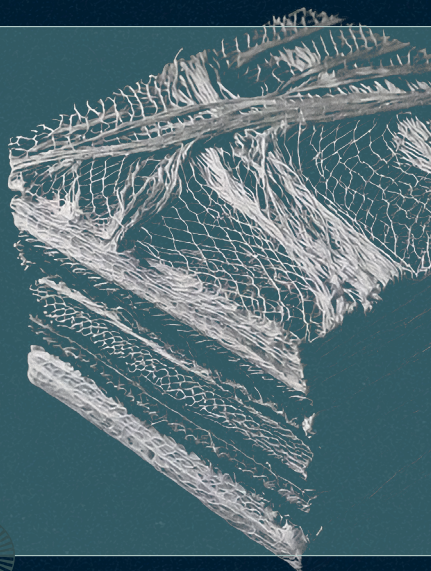

Introducing **CompactShield**, a pioneering ballistic composite solution, expertly engineered using advanced nanotechnology, high-performance fibrous materials, and state-of-the-art energy absorption structures. This revolutionary material redefines protection with a lightweight, slim, and aesthetically refined design, all **without compromising ballistic integrity**.

From concept to production, 100% designed and manufactured in **Portugal**.

Engineered Excellence

Developed with cutting-edge ballistic technologies:

- Versatile across diverse fields: defence, security, construction, mobility;
- Unites superior strength with an ultra-light profile;
- Composed of high-performance, recyclable, and sustainable materials;
- Offers a seamless fusion of protection and design adaptability.

Ballistic Protection Tailored to Your Needs

MOBILITY APPLICATIONS

Certified to NATO STANAG 4569 — Protection Levels 1 to 4

PERSONAL PROTECTION

Certified to NIJ Standard 0108.01 — Levels II to IV

ARCHITECTURAL & STRUCTURAL SOLUTIONS

Certified to NIJ Standard 0108.01 — Levels IIIA to IV
