

Rochester Cable Showcases Advanced Cable Solutions at DSEI Japan 2025

Rochester Cable, a Hexatronic Group company, is proud to participate in DSEI Japan 2025, highlighting its expertise in designing and manufacturing high-performance cable solutions for harsh environments. With a legacy dating back to 1794 and over 75 years specializing in electro-optical cables, Rochester Cable delivers reliable, precision-engineered solutions for industries operating in extreme conditions.

Based in Culpeper, VA, Rochester Cable's U.S. manufacturing roots are central to its reputation for quality and performance. Serving industries such as oceanographic research, renewable energy, and industrial applications, Rochester Cable provides custom-engineered solutions built to withstand the toughest challenges.

"DSEI Japan is an opportunity to connect with industries that rely on performance and reliability in the harshest conditions," said Mark Casselton, CEO of Rochester Cable. "We are proud to showcase how our custom-engineered solutions meet these demands with precision and durability."

As part of Hexatronic Group, Rochester Cable leverages global resources and in-house expertise to drive innovation, ensuring the highest standards of quality and performance.
