About BlueRoom

BlueRoom, a pioneering Mixed Reality Simulator from Real Response, offers immersive and hands-on fine motor training experiences in detailed virtual environments. Its unique multiplayer capability enhances collaborative learning, making it ideal for preparing for complex and hard-to-access scenarios.

Central to BlueRoom's innovation is our Mission Control system and award-winning biometric technology. These cutting-edge features empower trainers to monitor and dynamically adjust scenarios in real time, ensuring each training session is precisely tailored to the trainees' needs.
