FIVECAST ONYX DISCOVERY

FAST, BROAD AND INTUITIVE SEARCH AND DISCOVERY

Fivecast ONYX delivers a powerful discovery capability that enables your analysts to perform fast searches across millions of publicly and commercially available data sources and billions of data points to quickly map digital footprints, verify information, and resolve identities within an intuitive interface.

FAST RESULTS FOR CRITICAL INSIGHTS

With a customizable and intuitive interface, the solution facilitates an iterative workflow that's aligned to the intelligence cycle. Analysts can continually expand on searches across thousands of pivot points, leveraging insights to quickly compare results across many data sources, springboarding to deeper investigations when required.

BROAD DATA BEYOND SOCIAL MEDIA:

The user driven search tool draws on secure, best-of-breed data sources utilizing market-leading data collection capability across news streams, search engines, people/company databases, social media, sanctions, watch lists, curated datasets, and dark web and data leaks.

KEY BENEFITS:

Fast Performance

3 clicks to start a search.

Results in 15 seconds.

Directly launch into social media from other data sources.

Broad Data Access

Millions of data sources.

28B+ data points.

9B+ accounts and social handles.

8B+ people records & 280M+ companies.

10B+ data leaks & 1.4M sanctions records.

200M dark web records.

and many more...

Intuitive Interface

Customizable workspace and interactive widgets.

Advanced filtering & interrogation tools.

Fivecast ONYX end-to-end solution.

KEY FEATURES:

— Fast, broad search across social & non-social sources.

— Intuitive & interactive, featuring networking, filtering and interrogation tools.

— Utilize relevance scoring, quickly prioritize, review & hide results.

— Iterative workflow, expand search from thousands of pivot points.

— Reporting summaries for entities of interest.

— Springboard to deep investigation and collection.

FLEXIBLE USE CASES:

Fivecast ONYX Discovery enables identity resolution, information verification and digital footprinting across a range of complex use cases including:

— Transnational organized Crime.

— Screening and vetting.

— Extremist threat monitoring.

— Corporate security - IP theft, due diligence & supply chain risk.

— Financial crime – Due Diligence, KYC, AML, CTF.
