

C90 WEAPON SYSTEM

covering all scenarios

A family of **90 mm caliber** weapon systems for the infantry, **the lightest in the word in its class**, which allows shooting from **Confined Spaces** (CS90) and has a **Re-usable version** (C90 Reusable).

All systems include a **2X optical sight** and a firing mechanism, both integral parts of the launching tube. Compatible with **Night Vision Device VN38-C**, with **interchangeable optics**, which is assembled and dissassembled on the battlefield in seconds.

C90 FAMILY

90 mm weapon systems for the infantry with **multiple versions**:

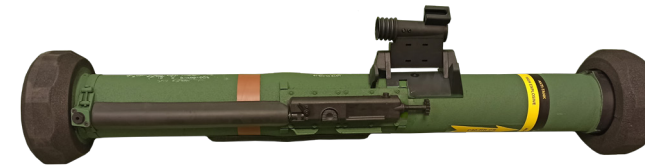

C90-CR (M3.5), CS90 (for shooting from confined spaces), C90 Reusable (system composed of a reusable tube capable of firing all ammunition types of the C90 family). Variety of **ammunition types** (anti-tank, dual purpose, smoke, anti-bunker and enhanced blast).

C90-CR (M3.5)

The **single shot** version, the **lightest** in the market

The 90 mm caliber Weapon System for infantry composed of a variety of munitions (anti-tank, dual purpose, anti-bunker and smoke) integrated in a **disposable launching tube**.

CS90

The **single shot** version with **confined space** capabilities

The 90 mm caliber Weapon System for infantry composed of a variety munitions (anti-tank, dual purpose and anti-bunker) integrated in a disposable launching tube, which can be fired from **small confined spaces**.

C90 Reusable

The **Reloadable** version

Reusable launcher tube, with 2,5X optical sight and firing mechanism, that fires a variety of ammunition types (anti-tank, dual purpose, anti-bunker and enhanced blast).

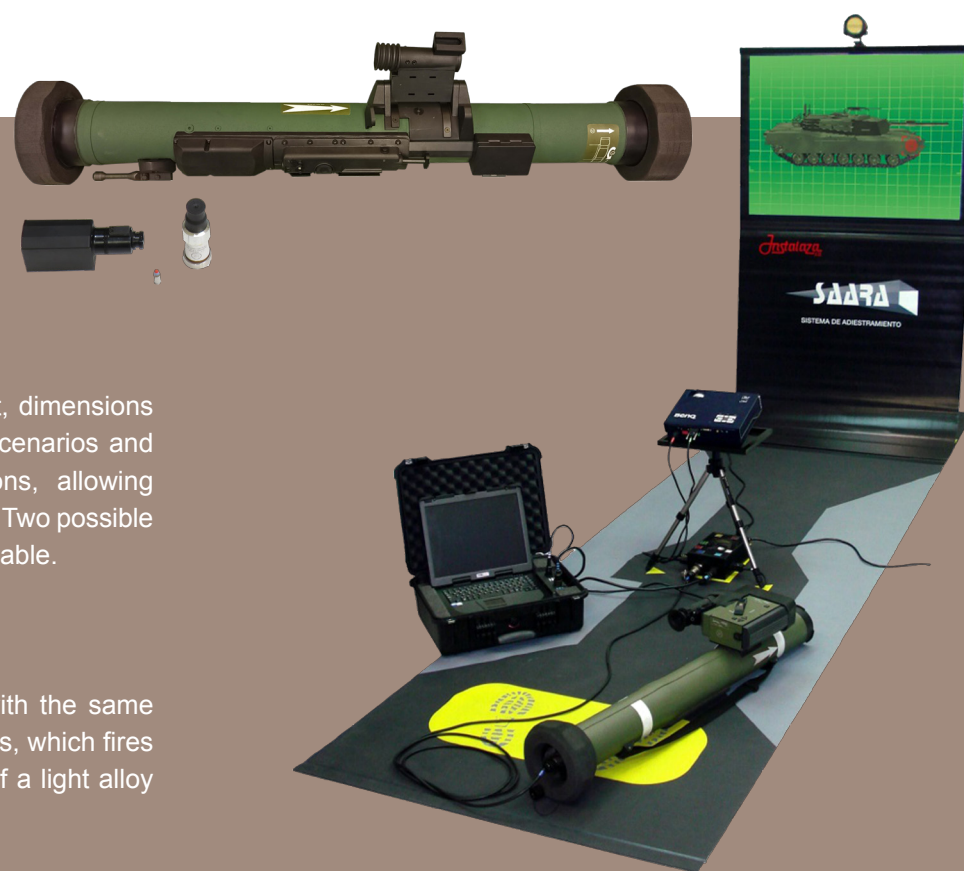

C90 family Trainers

Simulated training: SAARA

Simulated weapon, with the same weight, dimensions and handling, which recreates different scenarios and targets, including night combat situations, allowing complete gunners' training and evaluation. Two possible configurations for training: indoor and portable.

In-the-Field training: TR90-BT y TR90 (M3)

Subcaliber trainers for the C90 family, with the same handling as the lived C90 weapon systems, which fires a small caliber bullet or an arrow made of a light alloy respectively.

VN38-C, night vision for C90 family

- Mounted adapter device for easy and fast assembly in the weapon systems
- Image intensifier: Gen 2+ or higher
- Reduced weight 750 g with batteries
- Low power consumption
- Interchangeable optics
- Firing configuration (1X)
- Surveillance (3,3X) configurations
- Field: 13°
