# About Us

Tufwrap is an Australian-owned and operated company specialising in **environmental containment and asset preservation**. Since 2010, we have provided expert service, supplies, and training, offering complete solutions for **logistical monitoring, transport protection, preservation, and critical asset management**.

Backed by comprehensive industry knowledge and a growing network of global partners, including expansion into Southeast Asia, Tufwrap ensures tailored, turnkey solutions designed for diverse sectors and asset life cycles.

# Top Features

Trusted for over a decade on projects across **Australia** and **Asia**, we secure the protection of high-value assets and timely delivery even in the harshest environments.

We offer efficient containment solutions for diverse industries and projects of any scale. Our systems are **engineered to deliver safety, efficiency, and environmental protection on worksites.**

Additionally, we provide encapsulation solutions that protect against bad weather, keep sites safe by containing debris, control moisture and temperature, cut cleanup costs, and provide a private, clean-looking space for advertising.

## CONTAINMENT

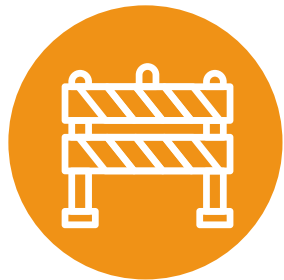

Leading provider of innovative containment solutions for environmental exclusion, hazard control, and project-specific needs.

# Containment Services

## **Blasting, Painting and Coating Containment**

Engineered systems to control hazardous materials and maintain safe environments during surface preparation and coating activities.

## **Weather & Site Protection**

Solutions that shield projects and assets from environmental damage, including UV-retardant and flame-retardant shrink films.

## **Hazardous Materials Exclusion**

Specialised containment for asbestos, lead paint, and other harmful substances to meet regulatory standards.

## **Work Site Safety**

Systems designed to separate work areas, minimise contamination risks and protect against debris or falling objects.

## **Environmental Controls**

Advanced dehumidification and temperature management for optimal worksite conditions and long-term containment.

## **On-Site Installation**

Fully qualified service teams for quick and effective applications, including shutdowns, decommissioning, and custom-fit solutions.

## **Flooring Systems**

Durable, watertight flooring options for added safety and containment.

# Top Features

## Specialisation in advanced anti-corrosion and preservation solutions

We ensure operational readiness for critical assets in all environments and provide **comprehensive, lifecycle-focused systems** designed to protect and extend the life of ferrous and non-ferrous materials.

## Partnered with GreenVCI, I.C.E. and Overwatch Systems

We deliver turnkey solutions for OEMs and global projects. With advanced technology, custom manufacturing, and technical services, this positions us as **a trusted leader in asset preservation across industries**.

# PRESERVATION

Advanced corrosion prevention and preservation solutions tailored to a diverse range of industries.

# Preservation Services

## Short and Long-Term Preservation

Systems designed for asset lifecycles ranging from 3 months to 15 years.

## Lifecycle Support

Complete implementation from OEM production to spare management, care, and maintenance.

## Onsite Services

Preservation solutions for commissioning, decommissioning, and shutdown environments.

## ESD Protection Systems

Anti-static and conductive systems for sensitive assets.

## VCI Technology

Non-toxic, eco-friendly corrosion inhibitors manufactured in-house.

## Custom Fabrication

Design and production of bespoke bags, covers, and liners tailored to asset needs.

## Monitoring & Maintenance

Continuous tracking through Overwatch Systems' IoT platform for real-time data on asset conditions.

## Technical Writing & Training

Development of SOPs, preservation audits, and consultation services to ensure smooth implementation.

## Corrosion Laboratory

In-house testing and development for optimised protection systems.

# Top Features

Tufwrap manufactures and supplies a diverse range of high-quality products designed to meet the demands of modern containment, preservation, and monitoring projects.

We blend innovation with sustainability by offering **eco-friendly VCI products**, and custom **products that protect assets and the environment**. We prioritise sustainability by using 100% recyclable films and tapes made from pure virgin resins (LDPE).

## PRODUCTS

A selection of innovative, eco-friendly products for containment, preservation, and monitoring, focused on sustainability and recyclability.

# Products Offered

## Eco-Friendly VCI Technology

Biodegradable and environmentally safe volatile corrosion inhibitors (VCIs) that protect assets without harmful chemicals.

## Shrink Films

Available in various sizes, including UV-retardant and flame-retardant options, made with materials that align with sustainable practices.

## Flooring Systems

Durable, watertight solutions designed for containment with environmentally conscious manufacturing.

## Rust Removal & Cleaning Solutions

Eco-friendly rust removers and degreasers formulated with environmentally safe ingredients.

## Heat Tools & Accessories

Energy-efficient tools for shrink-wrap installation, contributing to sustainable project execution.

## Access Hatches

Designed with sustainability in mind for easy and secure entry without compromising environmental goals.

## Tapes, Webbing, & Ventilation Products

Essential components for site safety, with materials selected to reduce environmental impact.

## Desiccants

Effective humidity control solutions to protect products from moisture damage, corrosion, and mold during storage and transit.
