NOT JUST A GAME – A MISSION-CRITICAL TRAINING TOOL

LifesaverSIM is a serious game and training platform that enables first responders to learn, practice, and retain critical lifesaving skills.

Designed for mobile devices, it delivers game-based training and skill assessment through virtual simulations — making it scalable, engaging, and accessible to a mass audience.

Battle-tested in full-scale conflict, LifesaverSIM is the standard training tool of top Ukrainian units — empowering rapid skill acquisition and sustainment without interrupting operational readiness.
