EXHIBITION MEZZANINES

EXHIBITOR PACK 2025

WE ARE THE **HALO** GROUP

IMAGINE // DESIGN // CREATE

HALOSTEELHIRE

HALODESIGN&BUILD

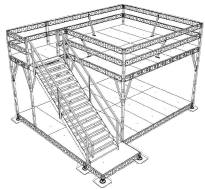

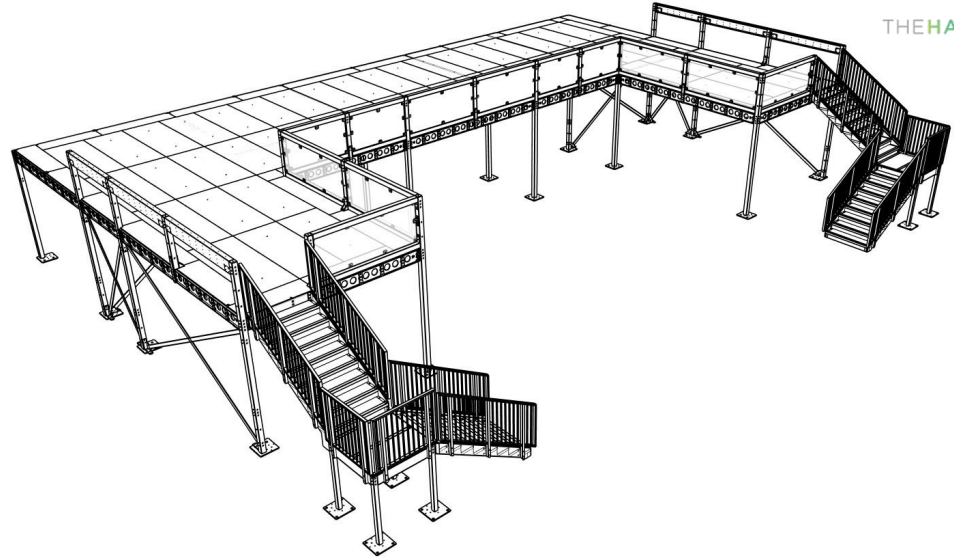

HALOSTEELSALES

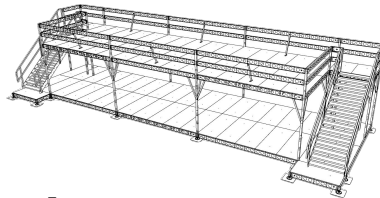

FAST, FUNCTIONAL & BEAUTIFUL THAT'S HOW WE BUILD MEZZANINES

KEY FEATURES:

- Multi-level mezzanine system
- Modular bays and customisable layouts designed for events
- Versatile branding & cladding options
- Powder coated steel for a client friendly finish
- Build times from 4h+

5m x 5m Formation

5m x 15m Formation

10m x 15m Formation

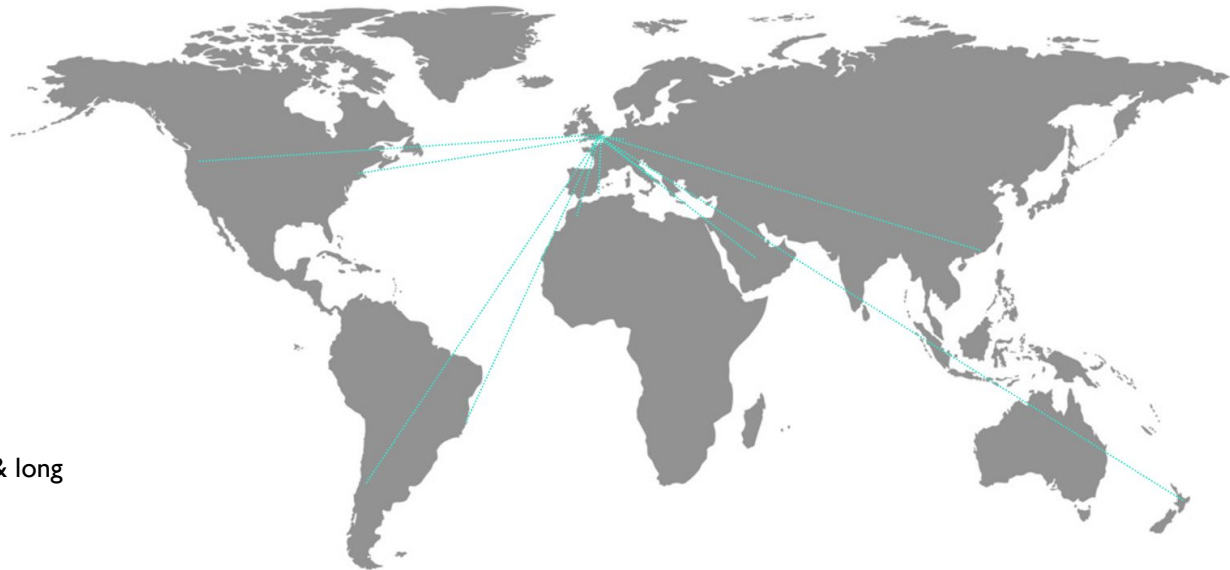

Bespoke Formation

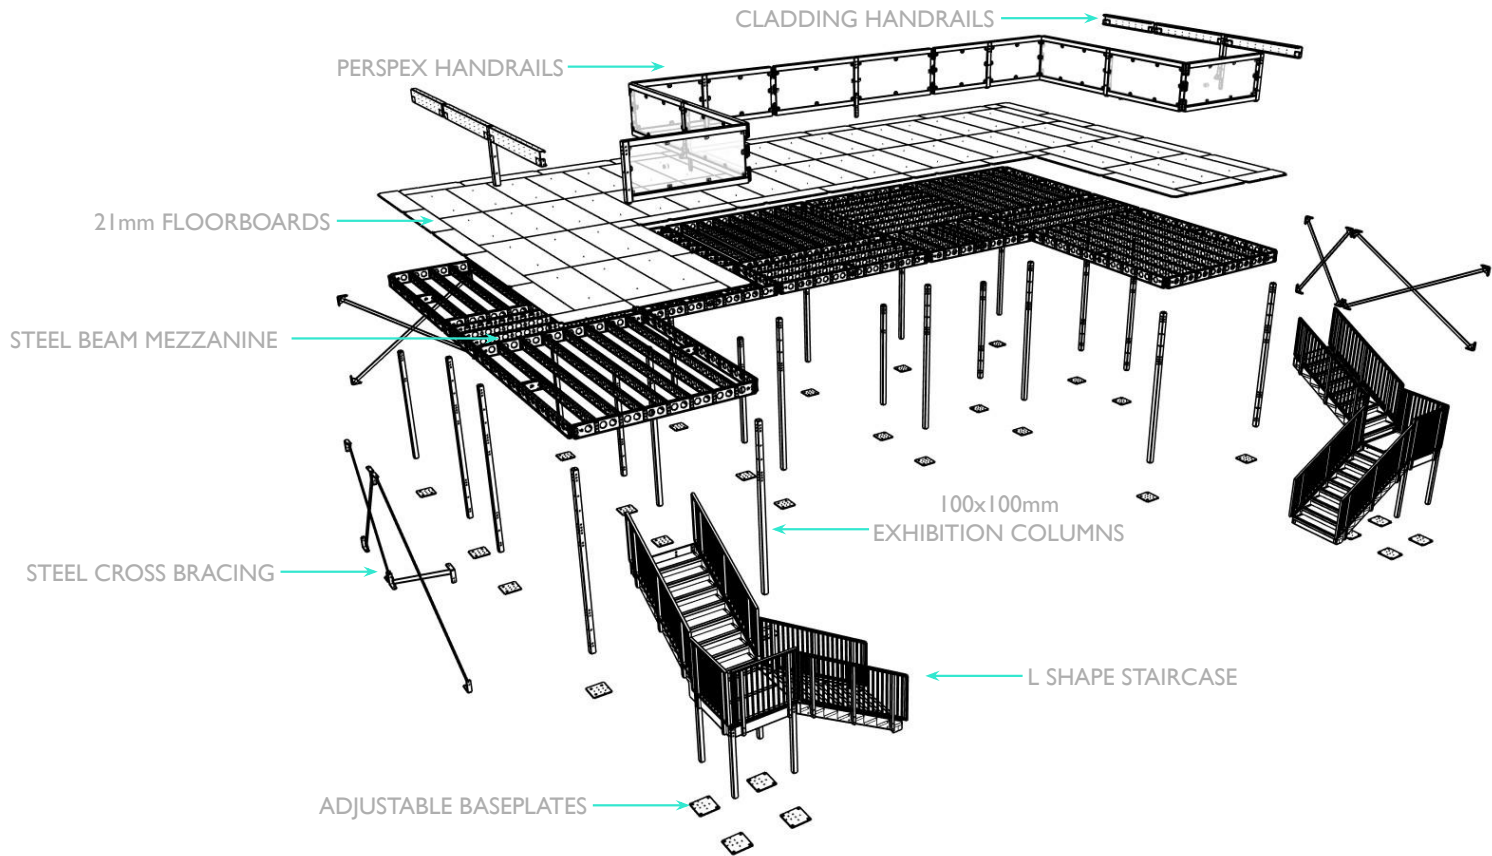

WE HAVE
**SUCCESSFULLY
DELIVERED PROJECTS
IN SIX CONTINENTS**
SPANNING THE LAST 15+
YEARS

SECTORS:

- Temporary demountable structures
- Permanent structures
- International touring structures
- B2B structure framework leases (short & long term)
- Fully managed brand activations
- Commercial interior fit-outs

SIMPLIFIED DESIGN & PROCUREMENT

- Rental based on standard m2 rates
- Ability to add staircases & handrails as required
- Location specific costs such as haulage & crew transport quoted per project
- All RAMS, structural calculations and project management are included as standard.
- Our experienced project managers will be on hand to guide you & your suppliers to successful delivery with our system

Select your size

Brief us on your location, timings, use of the space and any additional elements you require

Receive a quotation including site specific costs

Engage with a deposit to secure stock. Halo will then assign a project manager and produce 3d drawings for approval & sharing with suppliers.

OPTION 3

Glass Handrails

EXAMPLE ASSEMBLY METHOD

EXAMPLE TOUGHENED GLASS HANDRAIL WITH POWDER COATED GREEN STEEL AND HARDWOOD SAPELE HANDRAIL

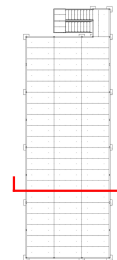

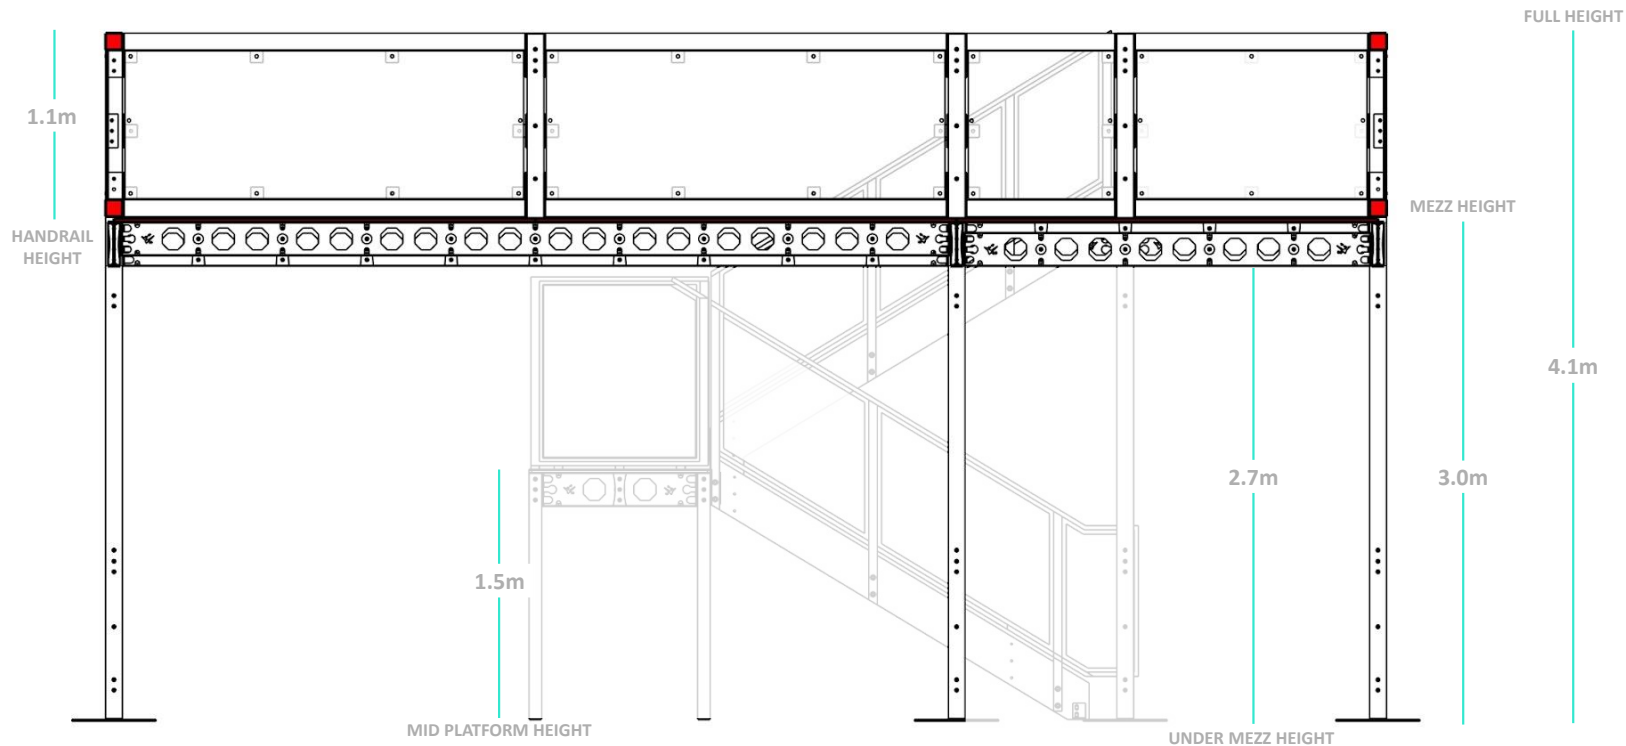

CROSS BRACING IS A STRUCTURAL REQUIREMENT FOR ALL OF OUR MEZZANINES.

THE EXACT LOCATION IS DICTATED BY THE STRUCTURAL CALCULATIONS BUT AS A RULE WE ALWAYS APPLY 2 BAYS RUNNING ON THE RED AXIS AND 2 BAYS ON THE BLUE AXIS.

THE CROSS BRACING CAN BE HIDDEN WITHIN INTERNAL WALLS OR POWDER COATED TO MATCH THE FACE BEHIND IT.

The background image shows a large exhibition hall with a high ceiling and industrial-style lighting. In the foreground, a prominent booth for 'BULLITT' is visible. The booth has a dark, industrial aesthetic with a metal frame and glass panels. A large, illuminated 'BULLITT' sign is mounted on the wall. To the left, a yellow wall features a logo and the text 'ST' and 'electronics'. A person is walking in the background on the left side.

LIGHT & WONDER ICE EXPO

THEHALO GROUP

An aerial view of a BMW Festival of Speed event space. The scene features a multi-level building with a BMW logo on the roof. Various BMW cars are displayed, including a white car on a lift, a yellow car, a blue car, a silver car, and a red car. A large staircase leads up to the building. The background shows a parking lot and some trees.

ABOUT US

We are pushing the boundaries with modular structures to create world class experiences, that bring people together.

Our highly experienced team pride themselves on grounding our client's ideas in reality. Creating, designing and building vibrant spaces and memorable brand experiences that leave lasting impressions.

We are passionate about doing things differently.

Delivering modular structures that are fit for purpose, merging the strengths of a permanent building with the flexibility of temporary structure.

SUSTAINABILITY

isla.
member

We feel strongly about protecting the world we share and are committed to drive sustainability across all our projects.

The Halo steel structure system is fabricated in the UK and with our servicing and regular maintenance, the components retain a minimum of a 10-year lifespan. The modular nature of the kit means it can be adapted for almost any project.

Sustainability filters into all aspects the design, build and operations of every activation. Initiatives such as applying circular economy principles to all our designs and materials used, recycling waste, and sourcing FSC® Certified Standard wood materials are standard practice.

We are enforcing a minimum waste policy with natural materials like wood batten and sheeting. This means, where possible it won't be used onsite or on our builds which minimises all onsite wastage.

When we do produce waste, it is channelled through recycling centres, to make sure it is broken down in the most economical way possible.

THANK YOU
