

**Unlock the power of  
military training with our  
realistic 3D assets.**

# We are experts in creating software that allows your company to stand out from the competition.

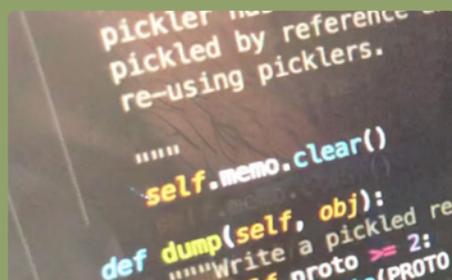

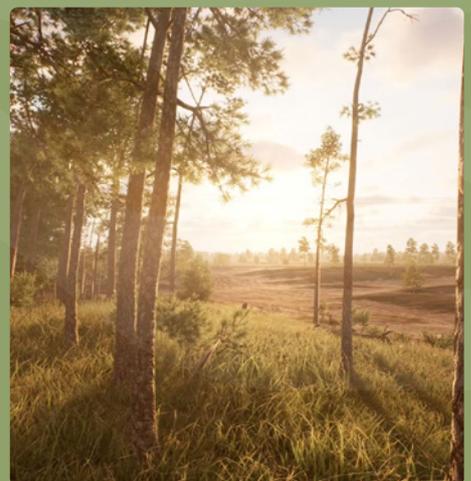

## Assets

Tailor our 3D models to meet your specific training needs, from different time periods to unique configurations and scenarios.

## Scenarios

Our team specializes in crafting realistic virtual terrains, urban landscapes, and combat scenarios, ensuring that your training exercises feel like the real deal.

## Software

We specialize in creating software that empowers your business to soar above the competition.

## Variants

FLEXIBILITY THROUGH  
CUSTOMIZATION

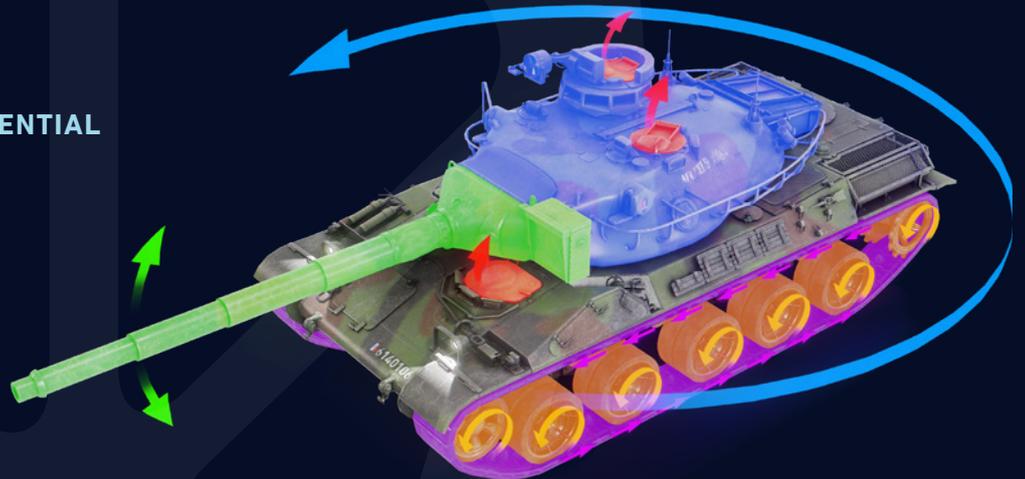

When it comes to tailoring your model, the possibilities are endless. Whether you think of unique destruction models, a variety of weapon options, or even a switchable camouflage net, we're here to make it happen.

Your vision, our expertise – the perfect partnership to bring your wildest ideas to life. Let's transform your model into a masterpiece of your own design!"

## Rigging

UNLOCKING THE FULL POTENTIAL  
OF YOUR MODELS!

From the detailed chains and wheels to the turret, complete with weapons and hatches for the driver, commander and gunner – its all there, ready to bring your model to life.

## References

DISCOVER THE HISTORY OF A TANK,  
AIRCRAFT OR VEHICLE.

In the world of military simulations, historical accuracy is the key to an immersive experience. Some vehicles have been in service for a very long time and have been visually modified through countless combat upgrades.

Let us be your historical detectives. We meticulously research the rich background history of your chosen vehicle or aircraft, paving the way for customized simulation scenarios.

## Options

VERSATILE TEXTURES FOR DIVERSE SCENARIOS

Our models are designed to excel in a variety of scenarios. Whether you're simulating summer environments, navigating desert landscapes, or braving the icy challenges of snow-covered terrains, our models come equipped with a range of camouflage options included in the package.

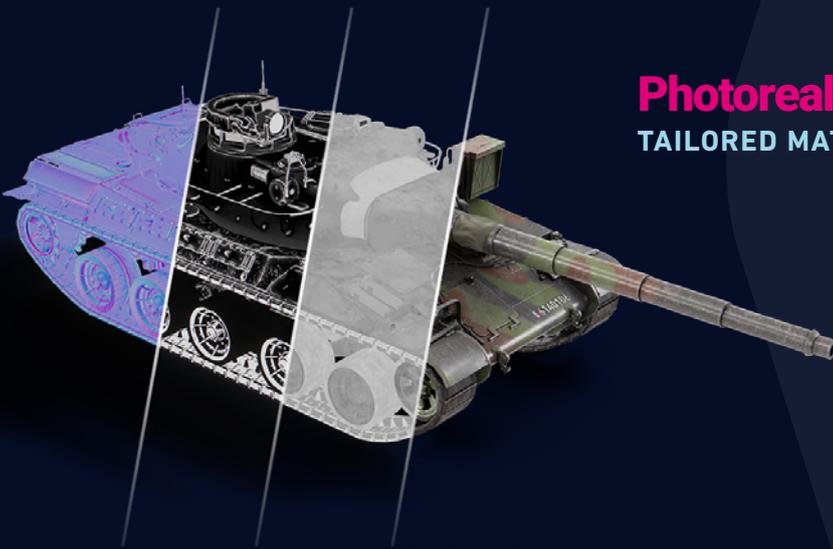

## Photorealism

TAILORED MATERIALS FOR YOUR ENGINE

At our core, we adapt to your needs. Depending on your engine's specifications, we craft the perfect materials for your project.

For cutting-edge engines, we specialize in PBR (Physically Based Rendering) materials and textures. Whether it's Spec-Gloss or Metal-Rough, or even Normal Maps optimized for OpenGL or DirectX, we ensure your visuals are at the forefront of realism.

## Performance

STREAMLINE MODELS TO YOUR SPECIFICATION!

We go the extra mile to ensure our models are perfectly suited for your target platform/engine. One of the key aspects of this optimization is our creation of LOD levels (Level of Detail). These are crafted manually to maximize the quality.

Depending on your planned visibility needs, we take the initiative to reduce the polygon count for each LOD level.
