

ITS is a leading supplier for the hire of portable and temporary traffic lights with the UK's largest fleet of Nissen and Siignal lights. Add to this our rapidly growing sales division boasting distribution deals with all the main manufacturers for PPE and site equipment making us your one place for everything you need in traffic management with customer satisfaction at the centre of everything we do.

## Hiring From ITS

We offer the latest traffic light technology, including our industry leading Solar range, with hire options to suit your needs at the most competitive prices without compromising on customer service and improving your companies efficiency. You will have access to our live tracking system which displays real time visuals – this shows your lights working through TLS technology, their GPS locations, voltages, geo fencing and much more.

## Customer Service

At ITS we are 100% committed to ensuring complete customer satisfaction and provide an outstanding service be it through hires or sales. Our range of products are carefully selected to ensure only premium quality products are offered to our customers. You will get a dedicated account manager and point of contact who will be able to assist with your requirements.

## Accounts & Payments

All major credit and debit cards are accepted as well as credit account facilities (subject to approval).

## Nationwide Service & Next Day Delivery

We offer a Nationwide service throughout the UK and Ireland with Next Day Delivery Options available where possible.

## The Nissen Fleet

We stock the latest Nissen LZA550 Traffic & Pedestrian signals offering 2Way, 3Way and 4Way Traffic Light solutions with the option of double heads and fully integrated Pedestrian Lights of up to 4 Crossings.

The Nissen LZA550 Traffic Lights offer:

- Compact design
- Industry leading run times
- AMOS (Automatic Man on Site) alleviates the need for costly man on site
- Auto restart in the unlikely case of comms failure
- Pedestrian lights use latest Bluetooth Technology
- Assurance with the connection quality digital reading
- Pre-programmed settings for ease of use
- One of the tallest portable lights in the UK
- Folding head for transport

Our New Stay-Lock Anti-Theft Security Clamp suitable for all Nissen V2 Pods.

## Nissen Solar

The game changing Nissen LZA Solar is revolutionising traffic management. It makes expensive, unnecessary battery changes a thing of the past and improves your company's efficiency and carbon footprint with the industry leading Solar light on the market.

In addition to all the benefits of the standard LZA550 the Solar offers:

- Folding Solar panel for transport
- 45 degree tilt Solar panel
- 350 degree rotatable platform for the Solar panel for optimum charging
- Built in Solar energy converter and battery management system
- Industry leading run times for Solar lights

“ The Nissen LZA550 Solar surpassed all our expectations running continuously for 10 months during 2023 with not one issue, having a huge impact on internal cost savings and our carbon footprint, an incredible piece of equipment ”

\* Subject to installation location and potential cleaning of Solar panel

# Siignal Lights

A New Era has arrived. The most advanced Smart portable traffic signal offering up to 8 phases in any combination of vehicle and pedestrian units, all wireless and through the industry first SiigSense™ touch screen full colour controller.

## The Siignal lights offer:

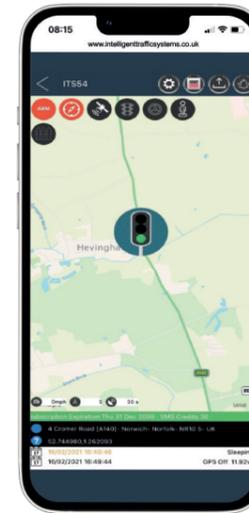

- Rugged and compact design
- Interlocking space saving design for transport
- All weather 7" full colour touch screen controller
- Future proof software & fully adaptable
- Digital site codes to lock out controllers
- Intelligence driven Prioritised Demand Strategy (PDS)
- Enhanced VA (EVA)
- Datum Point
- Adaptive Ambient Dimming (AAD)
- Built in Battery Management System
- Light weight from only 120kg

“ Reliability is key – the harsh environment which the equipment is subject to commands a robust approach to design ”

# The latest in Tracking

Example: screenshot off the mobile app, showing location, status and in the lower right corner, the battery voltage.

Example: showing a live 2Way mirroring what the traffic lights are doing on site. ITS54 on green and ITS53 on red.

- View real time GPS location
- View Battery Readings
- Watch as the tracker mirrors what the lights are actually doing on site, e.g. Red/Green
- Get alerts for any low battery or disconnections
- Geo-fencing
- Custom usage reports available

No matter if you have one set of lights or a fleet of lights on hire from us, with the live tracker you will always be able to see where and what your lights are doing, giving you complete control and reassurance.

## Portable CCTV

Our latest CCTV units offer 4G state of the art Hik-Vision camera's packed full of benefits for improving your site security or protecting your work force. With live streaming or access to the recorded footage on the cloud you will have all the footage required at your fingertips.

### Features:

- 4x Night Vision, Infrared & Weatherproof Cameras
- Wireless with battery run time lasting up to 7 days
- Foldable & Portable design for easy transportation
- Custom-made CCTV pole, for the best coverage aspects
- Viewable from your own guest account on either PC or Mobile App
- Easy to deploy & completely mobile
- Motion detection
- Zone Mapping

Below shows the quality of the live camera feed direct to your portal supplied by ITS.

### Improve your Site Security

Book your demo now and improve your site security and potentially reduce any unfounded claims of accidents on or around your sites.

## Solar CCTV

Looking for a longer term CCTV solution. Look no further than our Solar CCTV options.

### In addition to the standard CCTV unit:

- Continuous running through Spring, Summer and in to the Autumn with no battery changes required\*
- Extended run times through the winter months compared to a standard CCTV unit
- Built in Solar energy converter and battery management system

\* Subject to installation location and potential cleaning of Solar panel

## VMS

As with all our hire equipment our goal with supplying VMS is no different, to provide safer, smarter, greener digital roadside solutions for the Highways Industry.

### VMS-A & VMS-C:

The unique, compact design of the VMS-A makes it ideal for use in Urban area's and roads under 50mph while the VMS-C is perfect solution for roads 50mph and above, being our largest VMS display with a giant 2.7m x 1.85m screen. Each sign can accommodate up to 8 lines of text and 20 characters across.

- VMS-A Footprint 1.6m x 1.6m, VMS-C Footprint 2.7m x 2.7m
- Solar Powered – Environmentally Friendly
- Tilt & Rotate Solar Panel
- Full Text, Graphics and Pictograms
- 5 Colour display
- Remote Programming
- Non-Glare UV Resistant Polycarbonate Screen
- Speed/Vehicle Radar Detection Device options
- GPS Tracked and Security Locking Features
- Highest Quality LED's

## Automated Gates

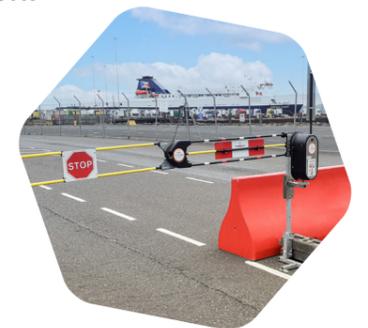

Looking for improved site security with remote or fully automated site access? We offer a range of options with our gates.

### SentriGate

Experience seamless traffic control with SentriGate, the portable, solar-powered gate solution. Designed for rapid deployment by a single operative, SentriGate offers incredible ease of setup and operation.

#### Key Features:

- Lightweight design
- Solar Powered
- Rotatable Solar Panel for optimum charging
- Remote Fob/controller
- Multiple gates can be controlled from one controller
- 125m range on controllers
- Collapsible for transport
- 3m Boom
- Drop obstruction sensor

### Instaboom

Solar powered with a fully collapsible 4m boom and can also be combined with the GS6 height detection kit.

#### Key Features:

- Hybrid – one month between charges without any Sun (solar charging)
- Telematics – online monitoring of voltage, status and instant alerts
- Compatible with the Wireless GS6 height detection kit
- Reliable with up to 150 actions per day/night
- Easily deployable by one person
- Solar Powered

## Barrier Hire

Looking for barrier hire? We stock large quantities of different barrier for short and long term hire. As with our lights, we offer a full installation and removal service.

2m Pedestrian Barrier with standard or anti-trip feet. All our Pedestrian Barrier has hook and eye design for linking

1m Water Filled Barrier available in Red and White. The barrier can also have additional galvanised white powder coated fence panels mounted on top to increase the height and attempts to climb over

Weighted Barrier available in Red & White

## Installation Service

At ITS we're here to support the traffic management industry in any way we can. Whether it be emergency or planned works, if you're short on resource why not reach out to us and utilise our Lantra qualified staff to deliver and install our lights direct to your site. This allows your team to install the Chapter 8 equipment while we programme and set the lights for you. Whether it's just a 2Way set of lights or a full double headed Multiphase Traffic and Pedestrian Light installation, no job is too big or too small.

Want us to maintain the lights too? No problem, we will remotely monitor the battery levels, advise when a change is needed and carry out any battery changes that may be required for you. Time for collection, simply let our office know a time and date and our team will be there to decommission and remove the lights as requested.

What else do we install? Our hire fleet doesn't just consist of traffic and pedestrian lights. We can provide anything on the previous pages, from barrier, automatic gates to CCTV pods, our teams can deliver and install for you.

Please note, we are not a traffic management company and therefore do not offer the full traffic management installations including all the Chapter 8 equipment.

# Equipment Sales

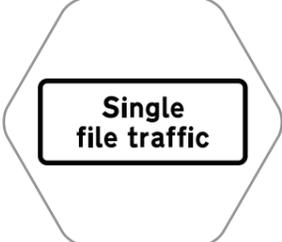

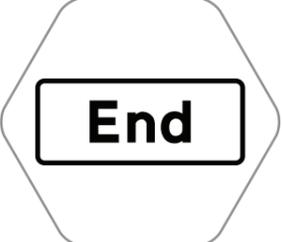

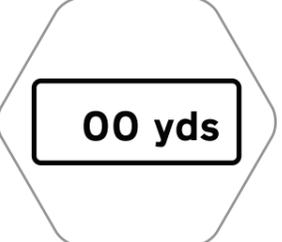

Not only do we hire traffic and pedestrian lights, CCTV pods and barriers, we also have key distribution deals in place with all the large manufacturers making us the one Company you can Hire or Buy all your Traffic Management Equipment from.

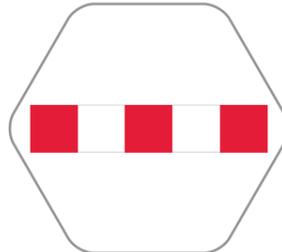

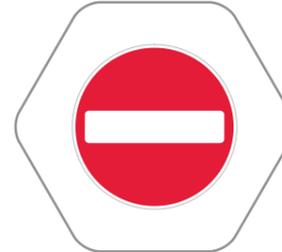

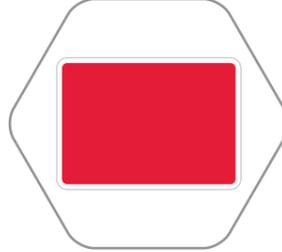

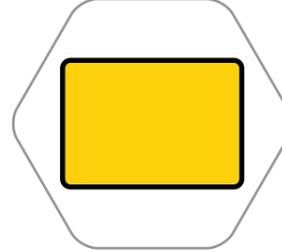

Nationwide Delivery Available 

# Signage

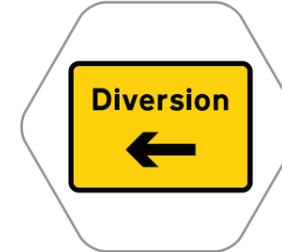

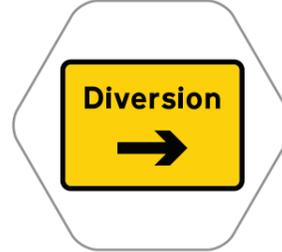

All our signage is available in Plastic, Zintec, Dibond and GRP, in a range of different sizes and options on drilled centres for temporary to high speed requirements.

Disposable powderfree blue vinyl gloves Box of 100

# How does it all work?

## Hiring

### Option 1 – Contract Hire

Contract Hire is a fixed term agreement with ITS which allows you to hire over a fixed period. This gives you a cost-effective hire option without the initial expense of purchasing. We will provide training by our qualified in house trainer/assessor providing competency sign off forms for your staff on the use.

As part of the agreement, we also take care of equipment maintenance. We will carry out equipment inspections and 6 monthly services for trailers. We ensure that all of our equipment is fully serviced and ready for use from the minute you take hire. We can supply charging stations and spare batteries to enable you to keep your lights running 24/7.

Contract Hire allows you to easily budget your fixed monthly costs. You will benefit from a reduction in the hire rate due to your commitment to hire from us for a fixed term from 12 to 36 months. At the end of your Contract Hire agreement, we will contact you to review your options. You may wish to return the equipment back to ITS, or renew your hire agreement. Either way, we are here if you need us.

Please note, the Contract Hire agreements are not contract purchase deals. There is no option to purchase the equipment at the end of your contract.

### Option 2 – Adhoc Hire

If you don't want to commit to a long term contact agreement, then Ad-Hoc hire is the option for you. Whether you want to hire for a day, week or month we will be able to help.

ITS is the perfect hire partner for any customer who requires reliable, easy to operate, cost reducing systems. Whether you want to hire an entire fleet, or top up your existing owned fleet, we are here to support your needs.
