

BETA
streets

Street Design. Reimagined.

Welcome to BetaStreets. A purpose built software platform, made to change the way people design streets and spaces.

BetaStreets Pro is available for subscription now. The game changing design platform enables users to convert design ideas into high quality visualisations in minutes.

The speed and ease of use opens up design to anyone. Visualisations can be created in a fraction of the time of needed using traditional design software.

This means powerful high quality visualisations can be used to communicate change more often, by more people. They can also be used in scenarios where required skills, production costs and time using other design processes are normally prohibitive.

BetaStreets Pro features include:

- Instant access to BetaStreets Platform
- Library of Things (100's of materials, street furniture items, UK road signs & markings)
- Object removal
- Shadow and colour match tools
- Save/load BetaStreets projects
- Regular Software Updates Library of Things Upgrades
- BS Academy Membership

BetaStreets is also available as a purpose built platform. Custom options include purpose built 'Library of Things' and organisational or project branding.

If you would like to discuss multi-licence purchases, or tailored platform builds please get in contact.

We are also interested to hear from materials suppliers and street furniture manufacturers interested in adding to the Library of Things.

Please email jon@betastreet.co.uk

The logo for BetaStreets features the word "BETA" in a large, grey, sans-serif font. Below it, the word "streets" is written in a smaller, orange, lowercase sans-serif font. Underneath "streets" is the website address "betastreet.co.uk" in a black, lowercase sans-serif font.
