

FOR IMMEDIATE RELEASE – 14/03/2025

S2IX 6.5: A Major Leap Forward in Secure Information Exchange

Utrecht, Netherlands – March 2025 – S2IX Group is proud to announce the release of **S2IX 6.5**, a significant upgrade to its secure information exchange platform. Designed to meet the evolving needs of modern defense forces, **S2IX 6.5** introduces enhanced capabilities for **naval and maritime data exchange**, making it an essential solution for military organizations and NATO forces requiring seamless and secure information sharing.

With major improvements in **data handling, link support, and interoperability**, **S2IX 6.5** strengthens operational effectiveness across joint and coalition forces. The platform's upgraded architecture ensures higher reliability and security in complex maritime environments, enabling superior situational awareness and mission coordination.

S2IX now includes an **AI driven chatbot** to allow you to monitor and interact with your data through multiple large language models. Further, S2IX is now natively extendable for multiple AI agents that can be built and implemented by our partners, faster than ever!

As part of our ongoing commitment to advancing secure data exchange, **S2IX BV** will be participating in **Undersea Defence Technology (UDT) 2025**, held in **Oslo, Norway, from 6-8 May 2025**. S2IX BV will exhibit as part of **Team Defence Australia (TDA)**, showcasing how **S2IX 6.5** addresses the critical challenges of undersea, naval, and multi-domain operations.

"S2IX 6.5 represents a major leap forward in military-grade information exchange," said **Nathan Pearce, European Chief Operating Officer at S2IX**. "With enhanced maritime capabilities, we are delivering a next-generation solution that provides armed forces with a **secure, reliable, and scalable** platform for exchanging operational and tactical data."

At **UDT 2025**, attendees will have the opportunity to explore how **S2IX 6.5** supports **secure multi-domain operations**, enabling forces to communicate and collaborate across secure environments with **zero-trust architecture** and **advanced replication management**.

About S2IX Group & S2IX BV

S2IX is a leading provider of **secure data exchange solutions**, enabling military, government, and industry partners to share critical information with **uncompromising security and integrity**. **S2IX BV**, headquartered in the Netherlands, focuses on European defense and NATO-aligned operations, ensuring seamless collaboration between allied nations.
